Amendments to the Specification:

Please replace the paragraph beginning at page 4, line 26, to page 5, line 7 by adding a sentence at the end as follows:

The above is an example only of but one type of use for the tool/pry bar. The tool is usable in many different ways and many different orientations. For example, it may be used to strip ceiling tiles from overhead, pry up heavy beams to permit a fork lift to slide under, or roll a large cylinder out of the way. The uses of such a pry bar are endless and the criteria is that the bar end, fulcrum and handle are arranged to enable the bar end tip to fit under the object to be pried, the fulcrum contact point positioned sufficiently close and in contact with a support, the bar end configured so as to enable the bar end tip to slide under the object, and with the handle sufficiently extended from the fulcrum to allow the user to apply a desired force to enable the user's leveraged force (arrow 24) to achieve raising of the object. Hereafter, such uses of such a pry bar is referred to as pry bar tasks.
